

KUTES
THE NEW
IRON AGE

A monochromatic yellow-green photograph of an industrial setting. In the center, a large vertical machine is cutting or grinding a piece of metal, creating a massive spray of bright sparks that radiates outwards. The background shows the complex structure of a factory with various beams, pipes, and other industrial equipment. The overall atmosphere is one of intense industrial activity.

WE ARE AN IRON LIKE BRAND

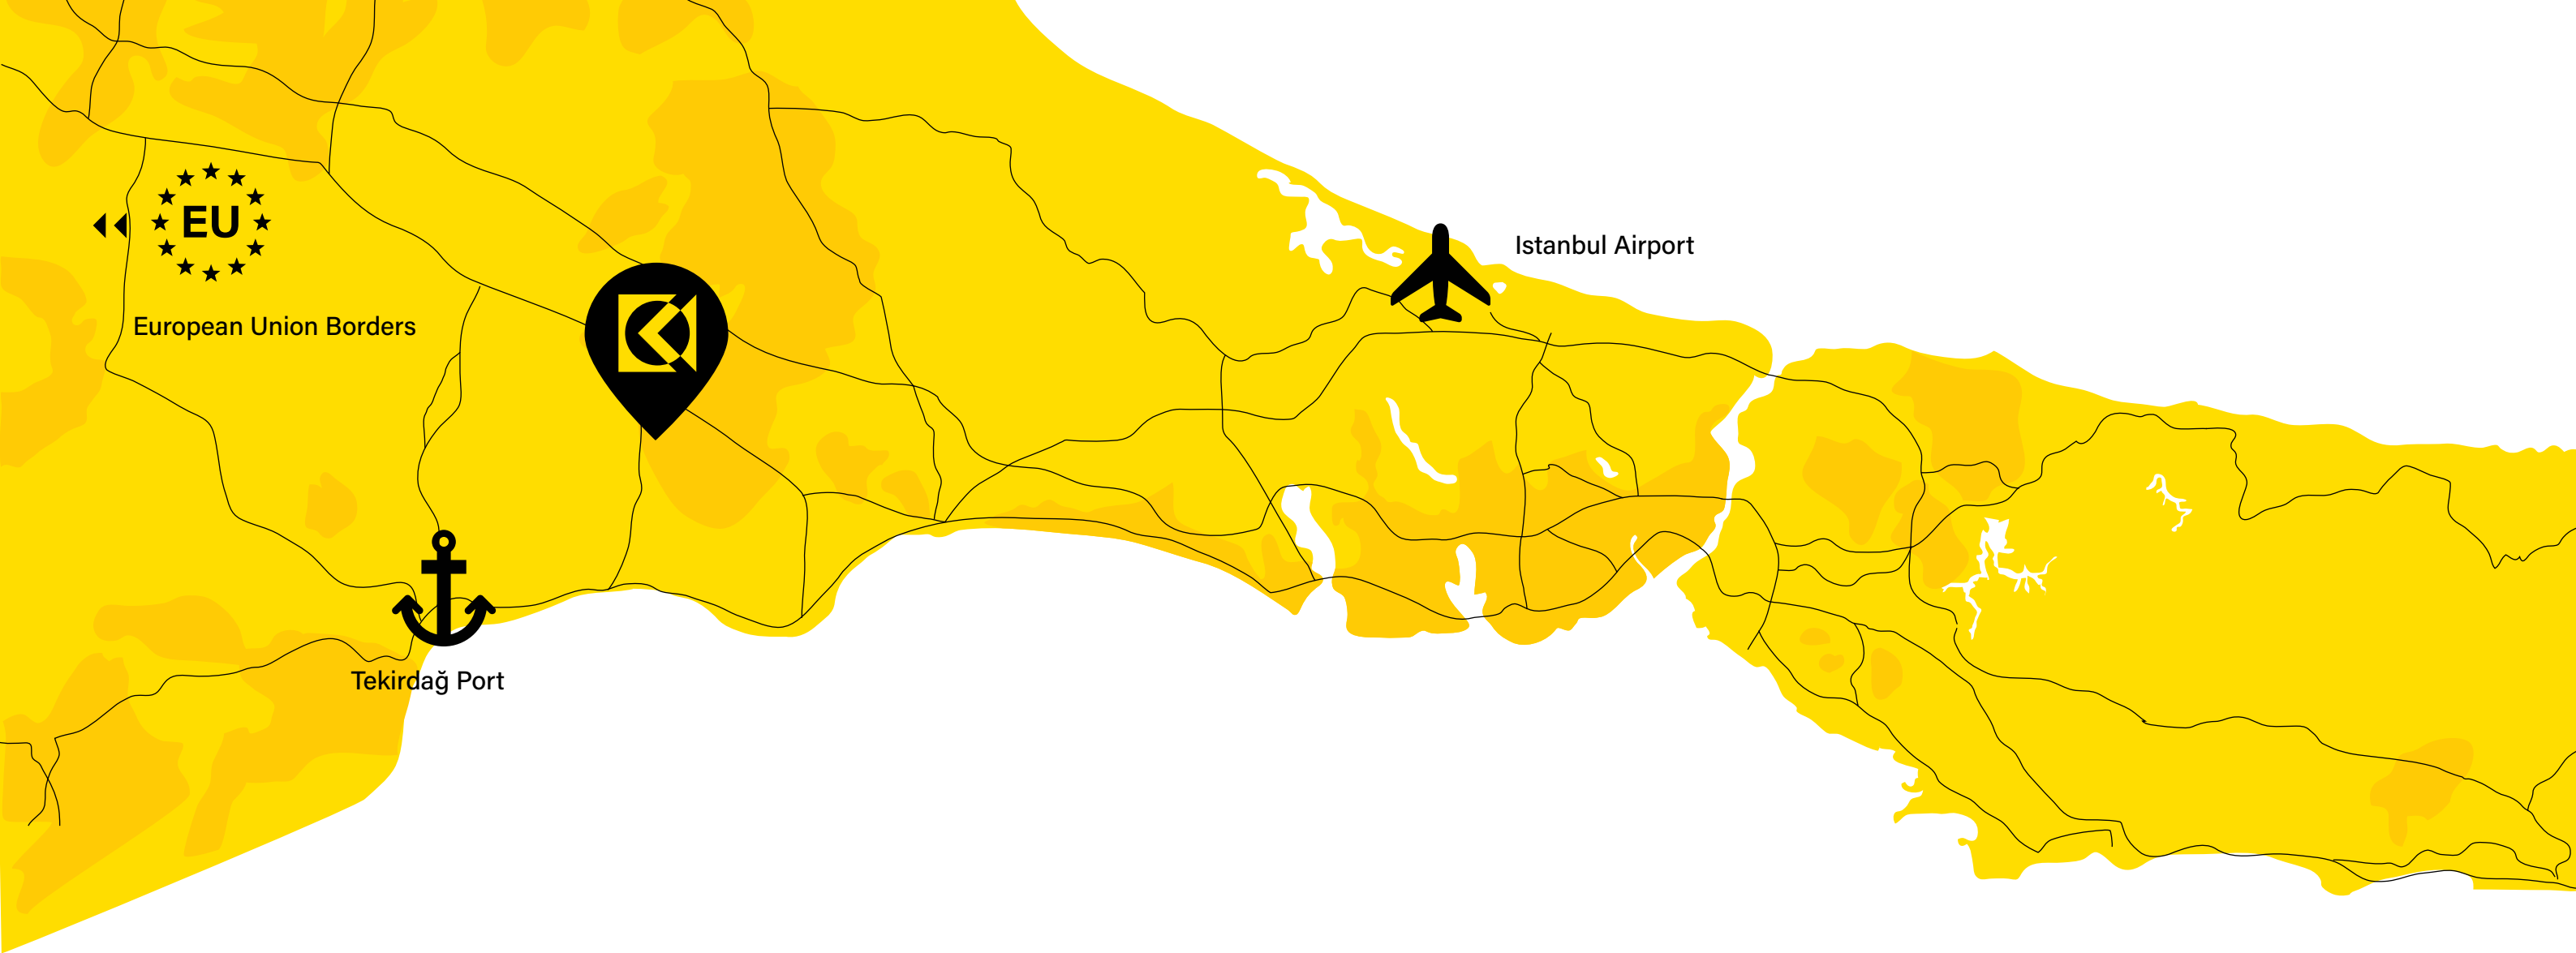

Our brand does not lose its essence under any condition. We are flexible as the liquid form of iron, always active and open for improvement, and as sharp as its solid form, resilient and dependable.

We continuously seek to improve our company while preserving our values. We appear and exist in all parts of life and value our work and our ideals before ourselves.

At **Kutes**, our work is much more than iron and our production operations.

In order to fulfill our responsibilities to our customers, to future generations and the world, we are working towards starting the **“New Iron Age”** at our facilities in **Terkidağ Çorlu** and leveraging our **30 years** history and the talent of our **350 employees**.

In Turkey's third largest industrial zone, 30,000
is located between Istanbul and the European Union as a special
industrial zone of **207,000 square metres in total; we are located**
35 km away from the sea port and 100 km away from Istanbul Airport,
the world's largest airport, with the status of authorised shipper.

—

We take pride in our financial stability, strong work performance, and wide product range. We adapt to innovations and new technology rapidly, and provide confidence to our customers and business partners with our 360 engineering approach.

OUR 30+ YEAR HISTORY PROVIDES US WITH THE EXPERIENCE NECESSARY TO NAVIGATE THE FUTURE AND FIND NEW PATHS TO HELP OUR CUSTOMERS SUCCEED.

WE CAN ACHIEVE
ANYTHING WITH OUR
WILL WHICH CAN
EVEN SHAPE IRON.

30
YEARS

30+ years of iron casting experience and 5 years of CNC machining experience.

9
SECTORS

We serve 9 different sectors.

14
CERTIFICATES

We have added a total of 14 certifications, 11 of which are quality certificates, to our quality assurance system.

75 M
EUROS

We have completed investments of 75 million EUR over the past 6 years.

50.000
TONS

We have 50,000 tons of iron casting capacity and more than 100,000 hours of processing capacity.

3
CONTINENTS

Our products are sold on three continents and more than twelve countries including the USA, China, Italy, France and Germany

OUR QUALITY CERTIFICATES

IATF 16949 2016
Automotive Quality Management

ISO 45001 2018
Occupational Health and
Safety Management System

ISO 14001 2015
Environmental Management Systems

ISO/IEC 27001 2017
Information Security Management

ISO 9001 2015
Quality Management System

ISO 50001 2018
Energy Management System

Deutsche Bahn Ag Qualification
(Approved German Railways Producer)

AD 2000-W 0
(Pressure Vessels Appropriate Manufacturer Company Certificate)

Ped 97/23 ec(ped)
(Quality assurance system complying with pressure vessels directives)

Lloyd's Register
(Approved manufacturer for gray and nodular iron casting)

DNV
(Approved Gray and Iron Casting Manufacturer Certificate)

OTHER CERTIFICATES

Zero Waste Certificate
Governorship of Tekirdağ Provincial Directorate of Environment,
Urbanization and Climate Change

Authorized Obligor Certificate
Republic of Türkiye Ministry of Trade

Gender Equality Program Certificate
Escarus TSKB Sustainability Consultancy

OUR IRON CASTING FACILITY:

CAPACITY
We have 16 tons of capacity per hour

MOULDING
Two horizontal moulding lines with 120 capacity per hour

NUMBER OF TONNAGE
We realized 50,000 tons capacity

IN OUR Cnc machining FACILITY:

PROCESSING CENTER
We have 16 benches.

ASSEMBLY LINE

CAPACITY USE HOUR
Machining capacity for 100,000 hours

USE OF GREEN ENERGY
60% green energy

MARKET DISTRIBUTION 2022

KUTES LOOKS BEYOND THE PRESENT, POSITIONING FOR FUTURE GROWTH.

For the future, which we have deemed as the New Iron Age, we have planned new projects under our Kutes Operational Excellence Program.

TOTAL PRODUCTIVE MAINTENANCE

With TPM (Total Productive Maintenance) practices we aim to develop and strengthen the problem solving skills of our employees while actively ensuring participation in improvement activities and maximizing the efficiency of our production equipment.

INDUSTRY 4.0

With Industry 4.0, we strive to become the leader in the cast manufacturing sector while also increasing our production flexibility. We aim to concentrate on digitalization and quality management while establishing smart production lines.

INNOVATION

With continuous innovation being our motto, we will continuously move forward to better ourselves in product range, quality and supply periods while providing for our stakeholders.

OPERATIONAL SUSTAINABILITY

With a focus on continuous improvement, we will use our resources in the most efficient manner while responsibly minimizing our impact on the environment.

DIGITAL TRANSFORMATION

We will increase our agility by making our processes more observable, improvable and monitorable.

We take sustainable steps regarding energy use and natural resources, and are always looking to use technology to improve efficiency and be a leader in sustainable innovation.

At Kutes, we respect our planet and believe that every company should do their part to ensure a better future. We aim to become a leader in sustainability investments, while also working to make investments to reduce carbon energy use and protect the environment through sustainable projects.

We develop sustainability projects in order to create a positive effect on the environment in addition to social and economic benefits. We strive to use sustainable materials in our production, optimize our supply chain to reduce greenhouse gas emissions, and use solar energy to fuel as much of our operations as possible.

With this approach we aim to do our part by committing to sustainability as we incorporate this thinking into our every day work and practices.

With our quality policies, we aim to secure the satisfaction of our customers while emphasizing safety and quality in our efforts.

TO GREEN FUTURE WITH GREEN CASTING

Creating sustainable solutions to use energy and natural resources efficiently is not an option but a responsibility for us.

Our biggest goals are to be the pioneer of sustainable innovations in our sector and to change the idea that the casting industry is not eco-friendly.

We are currently working on projects such as using renewable energy sources, developing our facilities in harmony with nature and training sustainability conscious personnel.

We also incorporate sustainability into our future planning/targets.

We aim to be carbon neutral till 2033

We are taking steps to ensure that 90% of the energy used in our casting facilities comes from renewable sources.

We aim to complete ISO 14064 projects and ISO 50001 certification process in 2023, and CDP Reporting in 2024.

So why are we doing all of this?

Because we love what we do and we feel a responsibility to our world and our environment.

You can find our sustainability report here:

**WE CONSIDER OUR
CUSTOMERS AS OUR
BUSINESS PARTNERS.**

At **Kutes** we have worked with customers from over
12 countries spanning **3 different continents**.

Our customers are diverse, ranging from large multinational
corporations to new and innovative startups.

Each customer represents an important and valuable
reference for us.
